WASHINGTON DC WEATHER (°C)

	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
Average High	44	47	56	68	77	85	89	88	81	71	58	46
Average Low	25	26	33	42	52	61	65	63	57	45	36	28

Spring: March ~ May	Summer: June ~ August	Fall: September ~ November	Winter: December ~ February
<p>With beautiful weather and temperatures in the high 60's and low 70's, Springtime in Washington is the ideal season to enjoy all the sights of the city. Whether it's the brilliant colors of the Cherry Blossom Festival or the spectacular Memorial Day Parade down Independence Avenue, Washington leaves a lasting impression on even the most distinguished traveler.</p>	<p>DC summers are warm and locals will tell you that it can be a bit humid at times. Nevertheless, the Smithsonian Museums, National Aquarium, National Cathedral, and other "indoor" attractions will be sure to keep you cool during DC's warm summers. Many of the local cafés and rooftop restaurants provide the perfect outdoor dining experience on those cool summer nights.</p>	<p>The cool October temperatures and striking colors of the autumn leaves against the backdrop of monuments and memorials make for an unforgettable stroll through the nation's capital. Sample some of the city's local flavors with the Taste of DC Festival or enjoy free concerts at the Kennedy Center's Open House. The pleasant and mild temperatures begin to turn cold towards the end of November.</p>	<p>Don't let the cold winter weather and occasional snow storm keep you from exploring the city. Take time to ice skate in the middle of the sculpture garden near the National Mall, or experience the National Christmas Tree Lighting Ceremony. The ellipse in front of the White House Ellipse is the site of choral concerts, a nativity scene, live reindeer, a burning yule log and a lighted Christmas tree from each of the nation's states and territories.</p>
